[13th November 1961

(b) the number of students who are progressing in their respective studies without failing; and

(c) the nature of assistance given by Government to the students who are not progressing satisfactorily?

THE HON. SRI M. A. MANICKAVELU: (a) & (b) A statement is placed on the table of the House.

(c) Additional coaching, tutorial, lecture and practical classes are given to all the failed students.

SRI K. VINAYAKAM: While going through the paper placed on the table of the House, I find that the percentage of failure of Scheduled Castes and Backward Community students who have taken the medical course is too much when compared to the failure of students who have taken the Engineering course. What is this mainly due to? Is it due to the fact that the students have not been given proper training or whether they did not care much for the development in the medical course? If the present state of affairs is allowed to continue, there will be great dearth of doctors in the years to come. Will the Government therefore take early steps to step up the standards in the Medical Colleges?

THE HON. SRI M. A. MANICKAVELU: One reason is that the medical course is more strenuous and more arduous. On the whole, the standard is being kept up. So, we cannot attribute the larger number of failures to any lowering of standards.

SRI T. S. RAMASWAMI: What sort of special coaching is given to the failed students?

THE HON. SRI M. A. MANICKAVELU: I have already stated that lectures, practical classes, tution, etc., are being conducted as a special coaching.
